## TECHNICAL SKILLS

---

**Languages:** Python [Advanced], Java [Intermediate], C++ [Basic], JavaScript [Basic].

**Frontend:** React.js, Next.js, Vite, React Router, HTML, CSS, Socket.IO, Streamlit.

**Backend:** Node.js, Express.js, NestJS, REST APIs, JWT Authentication, Passport.js, Socket.IO, Multer.

**Mobile Development:** Flutter.

**Databases:** MySQL, MongoDB, Supabase, Firebase.

**Tools & Technologies:** Figma, Canva, Docker(Basic), Git, GitHub, Linux (Ubuntu), Postman, Bruno, Render, Netlify, Vercel, Bcrypt, Prisma.

## PERSONAL STATEMENT

---

I'm a Full-Stack Engineering student ready to turn real-world problems into practical applications that help people. I use lateral thinking to look at challenges from different perspectives and build solutions that work. Through a variety of projects, I've gained hands-on experience across web, backend, mobile, and real-time technologies. I enjoy working with teams, learning new technologies, and turning ideas into useful applications. Seeking an internship to contribute and grow in a professional environment.

## PROJECTS

---

### FOOD-WARS | [Github Repo Link](#)

Nov 2025 – Jan 2026

Built a real-time multiplayer game where players compete by guessing dish ingredients within a time limit.

- **Tech Stack and Frameworks used:** React.js, Node.js, Express.js, MongoDB, Socket.IO.
- **Problem Solved / Use Case:** Created an interactive multiplayer experience combining food knowledge with real-time competition.
- **Challenges Tackled / Learning Outcome:** Implemented real-time socket communication, synchronized game state, and multiplayer UI interactions.

---

### CHEF-GPT | [Github Repo Link](#)

May 2025 – Dec 2025

Developed an AI-powered recipe assistant that generates personalized recipes based on available ingredients, dietary preferences, and calorie goals.

- **Tech Stack and Frameworks used:** Python, FastAPI, Streamlit, Groq API, RAG, Function Calling.
- **Problem Solved / Use Case:** Helps users discover suitable meals from available ingredients while considering dietary and calorie requirements.
- **Challenges Tackled/Learning Outcome:** Applied prompt engineering, structured outputs, function calling, and RAG for personalized AI responses.

---

### SMART-NEWS | [Github Repo Link](#)

Apr 2026 – In progress

Developing an AI-powered mobile news application with categorized news, AI summarization, SmartBot interactions, and interactive quizzes.

- **Tech Stack and Frameworks used:** Flutter, Firebase, News API, Groq API.
- **Problem Solved / Use Case:** Simplifies news consumption through concise AI summaries, conversational assistance, and educational quizzes.
- **Challenges Tackled/Learning Outcome:** Integrated external APIs, AI summarization, chatbot functionality, and dynamic quiz generation in Flutter.

## EDUCATION ENROLLMENT

---

### Kalvium's UG program in CS (Software Product Engineering)

2024 - 2028

Campus: Chennai | Bachelor's enrollment: B.Tech CSE (WIP), Vels Institute of Science, Technology, and Advanced Studies(VISTAS), Chennai.

## ACHIEVEMENTS & EXTRACURRICULARS

---

- **Hackathons & Competitions:** Developed **Triplan** (React Native) in 24 hours at SRM's NXTGEN Hackathon. The app features an AI itinerary engine and **carbon-footprint calculator**, suggesting eco-friendly, animal-safe travel by flagging high-pollution transport.
- **Technical Development:** Completed a **Full Stack Development Course**. [Certificate](#)
- **Campus Engagement / Leadership:** Participated in a debugging event organized by the **Coding Club of VISTAS**, strengthening problem-solving and logical thinking skills.
- **Professional Development:** Successfully completed **Introduction to Entrepreneurship at the Basic Level** on July 22, 2026. [Certificate](#)
